

pappelina®

This colour sheet shows the full set of colours found in the complete Pappelina collection translated into the Natural Colour System, NCS*. Remember that the NCS swatch card shows the colour of an unwoven vinyl stripe, the colour of a woven product may appear slightly more intense. Please note that the colour samples of this document may appear different on different monitors, due to the many variations in monitors and browsers.

** This colour does not belong to the NCS 1950 standard colours.

* NCS, Natural Colour System, is a logical colour system which builds on how the human being sees colour. Colour is what we see, a subjective visual sensation. The NCS cross-industry colour system is used around the world for colour communication between designers and manufacturers, retailers and customers.
